National history in the post-Stalin period: example of Ukraine (1954-73)

Using the short-term grant over the period of one year, I finished the work on archival documentation on the proposed subject. In addition, about 80 scientific texts of the USSR (Ukrainian Soviet Socialistic Republic) historians of the years 1950-1970 were carefully studied. These works were selectively copied. The work resulted in collection of the literature and various sources of information for the initial research.

Moreover, the final fifth chapter of the research was finished. Four articles were submitted for publishing out of which two were published in scientific editions in Ukraine.
